MONISHWAR REDDY VARDIREDDY

ASPIRING RESEARCHER

Phone: +91 8341065699

Email: monishwar26413@gmail.com

Github: https://github.com/monishwar-reddy

LinkedIn:https://www.linkedin.com/in/monishwar-reddy-vardireddy-b41991282/

SKILLS

- **Programming:** Python, C, R, Latex.
- **Tools:** VS Code, Excel (Advanced), Jupyter Notebook, Google Colab, Overleaf.
- **Research:** Artificial Intelligence, Mathematical Modeling, Data Analysis, Pyrolysis of Animal manure.
- **Soft Skills:** Technical Writing, Problem-Solving, Communication.

EDUCATION

Bachelor of Technology, (2023-2027)
Specialization: Computer Science Engineering (Core)
Woxsen University, Hyderabad, Telangana, India.
CGPA: 8.44

Intermediate (10+2), (2021-2023)
Percentage: 83.7%

Matriculation (SSC), (2021)
GPA: 9.2

PROFESSIONAL SUMMARY

Passionate about technology and sustainability, with hands-on experience in AI research, data analysis, and sustainable solutions. Skilled at leveraging data-driven insights to develop innovative, impactful strategies that contribute to building a better and more sustainable future.

INTERNSHIPS

Woxsen University - Research Assistant
Hyderabad, India (May 2025 - Present)

- Contributed to the AI, Technology, and Emerging Fields Cluster.
- Required to analyze complex epidemic and computational models.
- Applied SEIR epidemic model, Monte Carlo simulation, and other approaches for predictive analysis.
- Strengthened research outcomes by providing insights into disease spread and probabilistic model behavior.

Woxsen University - Research Intern
Hyderabad, India (Feb 2024 - Jul 2025)

- Part of a research initiative on brain-computer interaction.
- Focused on EEG technologies and Human-Machine Interfaces.
- Conducted experiments and data-driven analysis on EEG signals.
- Published a peer-reviewed paper advancing brain-signal measurement techniques.

HCL Tech - Biomedical Signal Processing Intern
New Delhi, India (May 2025 - Jul 2025)

- Engaged in ECG-based biomedical research.
- Detect myocardial infarction (MI) using advanced ML models.
- Designed a lightweight CNN model integrating DWT and SVD, with preprocessing, feature fusion, and classification pipelines.
- Achieved high accuracy across MI subtypes, validated using ROC curve analysis.

Tedis Foundation - Founder
Remote (Jan 2025 - Jul 2025)

- Established an international foundation bridging technology and diplomacy.
- Lead initiatives empowering students in global leadership and sustainable development.
- Organized collaborations across Mongolia, India, and UAE; initiated TEDIS 2025 MUN.
- Successfully created a platform integrating diplomacy and technology for youth engagement.

CERTIFICATIONS

- Machine Learning with Python
- Probability & Statistics for Machine Learning & Data Science
- Python Programming Essentials
- Crash Course on Python
- AI For Everyone

INTERESTS

- Competitive Coding
- Research
- Data Analysis

Tiaano - R&D Analyst Intern
Chennai, India (Jul 2024 - Nov 2024)

- Worked on innovation-driven research projects.
- Provide experimental analysis and strategic insights.
- Conducted research experiments and analysed datasets for solution development.
- Delivered detailed reports with actionable insights adopted for implementation.

Woxsen University - Data Analyst Intern
Hyderabad, India (Oct 2023 - Apr 2024)

- Assisted university in digital branding and engagement.
- Improve online visibility and content effectiveness.
- Developed social media strategies and analysed LinkedIn engagement metrics.
- Enhanced visibility and engagement on institutional posts.

KEY PROJECTS

Ethical AI Fairness Audit App

Aug 2025 - Aug 2025

Developed ethical AI dashboard using Streamlit, Fairlearn, and Pandas to analyze HR datasets for fairness across sensitive attributes like gender, age, or race.

Cloud-Health-Record-Vault

Aug 2025 - Aug 2025

Developed secure cloud platform where patients can upload and store their medical files. Once uploaded, the system generates a time-limited access link, allowing patients to safely share their health records with doctors, hospitals, or caregivers.

Epic RPG 2D Battle Arena

Aug 2025 - Aug 2025

Developed browser-based, wave-based RPG battle game with auto-attacking enemies, and multiple difficulty modes.
